NEW: BG05K DIRECT FIX
FURRING CHANNEL CLIP

The new Judah BG05K BETAFILE® Direct Fix Furring Channel Clip is a modified version of the Judah BG05 BETAFILE® Double Membrane Insulation Clip. It suits rigid insulation board panels up to 50mm thickness, such as those supplied by Kingspan. >>

BG05K DIRECT FIX FURRING CHANNEL CLIP

When used with Judah 129 Furring Channel, the BG05K Clip provides an adjustment of 65 – 80mm from the substrate to the back of the lining board.

The clip was used extensively in conjunction with 2" Kingspan Rigid Insulation Board, Judah 129 Furring Channel and plasterboard lining to facilitate the thermal requirements for some external masonry walls in the Pinjarra Shopping Centre, Western Australia.

The BG05K Clip is available via special order, in stock packs of 200 pieces.

For more information on the BG05K clip, visit www.Judah-Steel.com, or call +1 352 328 1482 to speak with a Judah Technical Sales Representative.
